

Protect People and Buildings

Your mass notification systems are inherently broken. They aren't reaching everyone and not reliable when you need it most. There's no cost-effective way to install, setup, and manage everything without buying expensive and overlapping systems.

Is your budget preventing you from solving this problem?

Meet Carina: The Affordable Safety Solution

The first safety IoT platform to protect people and link device management with building intelligence; creating the next generation of mass notification.

Reach out

Allows people and buildings to reach out for help

Coverage

Reach everyone without missing critical information

Reliable

Continues to operate during internet and power outages

Affordable

Nex-gen features for legacy system pricing and no licensing fees

Intelligent Devices

Carina endpoints are the backbone of the system to help you achieve your safety goals and maintain an unbroken chain of communication.

Future-Proof Design

New software upgrades for no additional fee.

Prevent Communication Breakdowns

Automate your safety plan

Custom Carina scripts eliminates points of failure for each emergency scenario.

Reliable during any situation

Operates during loss of power, internet etc

IoT Sensor Network

Allows buildings to reach out for help, preventing small problems from becoming big ones

Stop relying on the unreliable.

People make poor decisions during stressful or emergency situations, Carina automates everything for a streamlined safety response.

Provides Full Coverage

Text, flashers, and audio alerts both indoors and outdoors.

Offline Device Alerts

Monitors network performance and reports back when specific devices stop responding.

Carina Platform Means Peace-of-Mind

Simplified Management

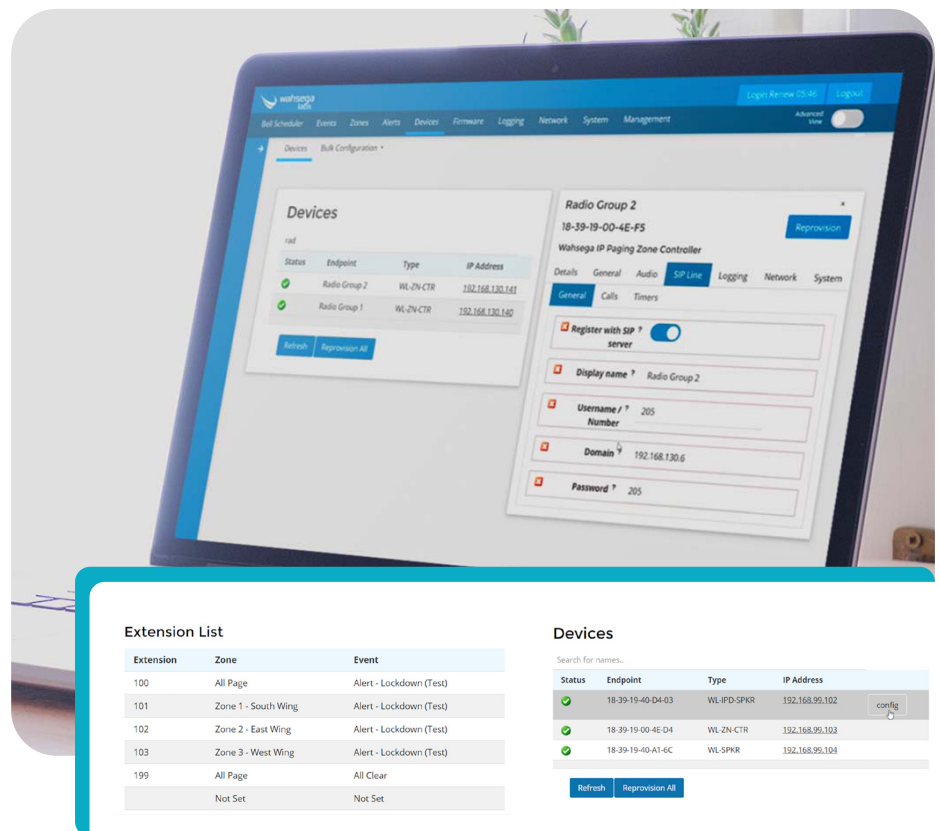

- ✓ Setup & Management
- ✓ Zero-touch provisioning
- ✓ Auto-syncing clocks
- ✓ Device health reports
- ✓ Customizing messages, tones, flashers, bells
- ✓ Simple creation of Carina Scripts
- ✓ Simple device firmware updates
- ✓ Powerful calendar scheduling; From recurring alerts to device management

Life Safety

- ✓ Automated messages
 - Inclement Weather
 - Active Shooter and intruders
 - Medical emergencies
 - Student physical altercations
 - Workplace accident
 - Environmental hazards
- ✓ Lockdown an entire campus with the push of a button

KEY FEATURES

- ✓ Powerful Calendar Scheduling
- ✓ Hybrid/Cloud design allows you to configure and manage from anywhere through a single dashboard*
- ✓ Maintains full functionality when the internet goes out
- ✓ Our platform last 10x longer on UPS during power outages
- ✓ Network of smart IoT sensors to avoid costly disasters
- ✓ Reach everyone with text, flashers, and audio both indoors and outdoors.

Intelligent Devices Complete Coverage

The backbone of Carina, these intelligent devices create a cohesive smart environment, providing safe and secure facilities at a price you can afford.

Speakers

(Complete audio coverage with two-way audio)

- Cover rooms, hallways and large spaces
- Cover outdoor areas with intelligible audio
- Two-way audio with connected help stations
- 50% reduction in installation costs
- Local room audio, voice reinforcement
- Each speaker locks and monitors two doors

Intercoms

(Monitor and control all of the entry points inside and outside of your campus)

- Intercom and help station in one unit
- Control campus access by unlocking doors and gates remotely
- Integrates with any IP PBX system
- Indoor applications for secure areas

Zone Controllers

(Integrate with and control legacy systems to get your message out)

- Integrate with legacy audio systems
- Send audio messages over mobile radios
- Prioritize important audio streams automatically
- Trigger devices with onboard relay
- Stream background music
- IoT sensor expansion port

Displays

(Complete audio and visual coverage with two-way audio)

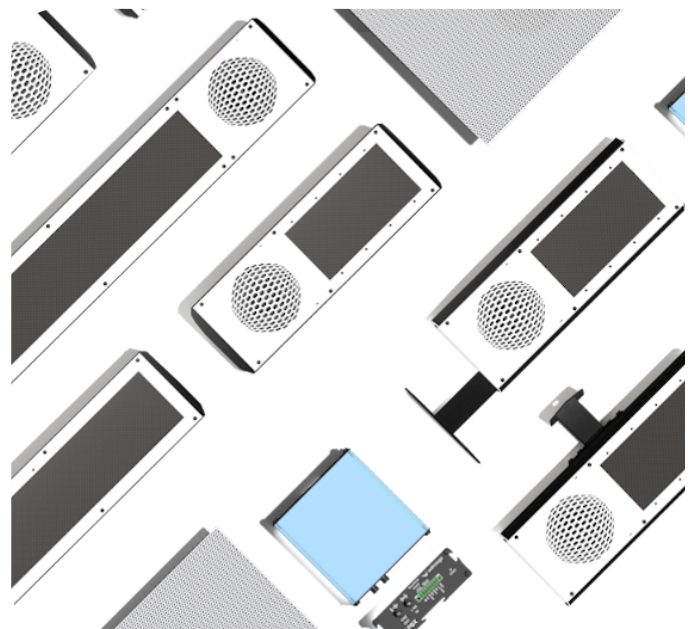

- Scrolling text
- Two-way audio with connected help stations
- ADA compliant
- Wide range of displays for proper visual coverage
- Configurable flashers to get attention
- Auto-synchronize time and date
- Vector font technology enhances reading comprehension

IoT

(Provides a clear view of building operations through a network of smart sensors)

- Proactive alerts when an issue is detected
- Prevent small problems from turning into big disasters
- Monitor door security, water leaks, and gas leaks
- Control building services like sprinklers, lighting, security cameras, access control, etc.

How does Carina affect your organization?

- Peace-of-mind
- You'll know if anything is wrong before disaster strikes
- Automatic system health checks so you know it works 100% of the time
- Frees up IT staff time
- Safer schools, buildings, and campuses.
- Key stakeholders are happy
- No more nickel and dime end-point license fees
- Expand endpoints in the future without any licensing fees
- Always enjoy the latest software feature upgrades without any additional fees
- Upgrade your building with IoT sensors and let it communicate with you.

Complete Coverage for the Same Budget

Hear from people like you

"We realized it was cheaper to do an IP system from Wahsega instead of replacing it with an outdated legacy system"

Lonie Packer

"It was awesome, turned it on, did what it was supposed to do"

Joel Brooks

"With the reduction in cabling costs, the Wahsega system was a budgeting godsend."
