

Double Sided Ceiling Mount IP Display for InformaCast®

Model No: WL-IPD-SPKR-510D-INF-TM

Description

The Wahsega Double Sided Ceiling Mount IP Display supports dual registration with InformaCast® and SIP. With network connectivity, scrolling LED display and built-in speaker, the Wahsega IP Display broadcasts both audible and visible messages to classroom occupants. Two integrated relays let building managers remotely lock classroom doors in the case of an emergency. A built-in microphone allows for two-way SIP communication, and time synchronization is handled by a network SNTP Server. The Wahsega IP Display can even power a second, analog Wahsega speaker up to 20 meters away via PoE cable, increasing the audio coverage in the space without requiring an additional cable home run.

Mounting and Installation

To use Power-over-Ethernet (PoE 802.3af), route a Cat 5e or Cat 6 Ethernet cable from a PoE switch to the LAN/POE port. Once the unit is successfully powered, the LINK/ACTV indicator LED will begin to blink.

Connect POE cable to connector at center, rectangular opening.

Route earthquake cable through small circular opening and secure to structure per local building and electrical codes.

Affix mounting bracket to a solid, horizontal surface using two bolts and anchors appropriate for that surface.

NOTE: For a suspended ceiling, Wahsega recommends using a Peerless-AV CMJ5R1 Adjustable Suspended Ceiling Plate.
